Subject: Microsoft Settlement

i dont like the proposed settlement. it stinks and makes me ashamed of calling myself a American citizen.

The settlement is a rhetoric of an undemocratic agreement that will let one company take away my freedom of choice and replace it with a government sponsored rhetoric that provides bad products and holds the United States economy to random.

No sir, do not let this pass. Listen to the other 9 states and use their settlement.

Do not be the fool.

Regards,
Steven

"We're not happy that a company known for illegal business practices took the unnecessary step of gaining access to our database. In spite of their assurances it will not be used for any purpose outside this case, we've alerted our users of Microsoft's actions and believe this is another way Microsoft is attempting to intimidate a potential competitor."
